

# Murach's ASP.NET 4.5 Web Programming with C# 2012

Introduction xix

## **Section 1 The essence of ASP.NET programming**

---

Chapter 1	An introduction to ASP.NET programming	3
Chapter 2	How to develop a one-page web application	31
Chapter 3	How to use HTML5 and CSS3 with ASP.NET applications	77
Chapter 4	How to develop a multi-page web application	117
Chapter 5	How to test and debug ASP.NET applications	165

## **Section 2 ASP.NET essentials**

---

Chapter 6	How to use the standard server controls	191
Chapter 7	How to use the validation controls	231
Chapter 8	How to work with state, cookies, and URL encoding	263
Chapter 9	How to use master pages	295
Chapter 10	How to use themes	323
Chapter 11	How to use site navigation and ASP.NET routing	341

## **Section 3 ASP.NET database programming**

---

Chapter 12	An introduction to database programming	371
Chapter 13	How to use SQL data sources	399
Chapter 14	How to use the GridView control	441
Chapter 15	How to use the DetailsView and FormView controls	481
Chapter 16	How to use the ListView and DataPager controls	521
Chapter 17	How to use object data sources with ADO.NET	551

## **Section 4 Finishing an ASP.NET application**

---

Chapter 18	How to secure a web site	597
Chapter 19	How to authenticate and authorize users	613
Chapter 20	How to use email, custom error pages, and back-button control	649
Chapter 21	How to configure and deploy ASP.NET applications	679

## **Section 5 Going to the next level**

---

Chapter 22	How to use ASP.NET Ajax	701
Chapter 23	How to create and use WCF and Web API services	733
Chapter 24	An introduction to ASP.NET MVC	763

## **Reference Aids**

---

Appendix A	How to install and use the software and downloadable files	795
------------	------------------------------------------------------------	-----

# Expanded contents

## Section 1 The essence of ASP.NET programming

---

### Chapter 1 An introduction to ASP.NET programming

<b>An introduction to web applications.....</b>	<b>4</b>
Two pages of a Shopping Cart application .....	4
The components of a web application .....	6
How static web pages are processed.....	8
How dynamic web pages are processed .....	10
<b>An introduction to ASP.NET development .....</b>	<b>12</b>
Five ways to develop ASP.NET applications.....	12
Three environments for developing ASP.NET applications.....	14
What about Visual Studio 2013? .....	16
The components of the .NET Framework .....	16
How state is handled in ASP.NET applications.....	18
<b>How an ASP.NET application works .....</b>	<b>20</b>
The user interface for the Future Value application .....	20
The files used by the Future Value application.....	22
The aspx code for the Default form .....	24
The C# code for the Default form.....	26

### Chapter 2 How to develop a one-page web application

<b>How to work with ASP.NET web sites.....</b>	<b>32</b>
How to start a new web site .....	32
How to add a web form to a web site .....	34
How to work with the Visual Studio IDE.....	36
How to add folders and files to a web site .....	38
How to open or close an IIS Express web site.....	40
How to convert a file-system web site to IIS Express.....	42
<b>How to use Visual Studio to build a web form .....</b>	<b>44</b>
How to enter the HTML for a web form.....	44
How to add a table to a form.....	46
How to add web server controls to a form .....	48
How to set the properties of the controls.....	48
Common properties for web server controls .....	50
<b>How to add validation controls to a form .....</b>	<b>52</b>
An introduction to the validation controls.....	52
How to use the required field validator .....	54
How to use the range validator .....	54
How to work with unobtrusive validation .....	56
The aspx code for the Future Value form .....	58
<b>How to add C# code to a form .....</b>	<b>62</b>
How to use the Code Editor.....	62
How to use page and control events.....	64
The C# code for the Future Value form.....	66
<b>How to test a web application.....</b>	<b>68</b>
How to run an IIS Express web site.....	68
How to view the HTML that's sent to the browser.....	70

### **Chapter 3 How to use HTML5 and CSS3 with ASP.NET applications**

<b>The Future Value application with CSS formatting .....</b>	<b>78</b>
The user interface .....	78
The HTML that's generated for a new form.....	78
The aspx code for the application .....	80
The CSS style sheet for the application .....	82
<b>The HTML and CSS skills that you need .....</b>	<b>84</b>
How to code HTML elements .....	84
How to use the HTML5 semantic elements .....	86
How to use the div and span elements with HTML5 .....	88
How to provide CSS styles for an HTML page.....	90
How to code the basic CSS selectors .....	92
How to code CSS rule sets and comments .....	94
How to ensure cross-browser compatibility .....	96
<b>Visual Studio features for working with HTML .....</b>	<b>98</b>
How to use the features for entering HTML .....	98
How to add the attributes for the WAI-ARIA accessibility standards.....	100
<b>Visual Studio features for working with CSS.....</b>	<b>102</b>
How to create and edit an external style sheet .....	102
How to use Visual Studio to create and modify styles.....	104
How to use the Apply Styles window .....	106
How to use the CSS Properties window .....	108
How to use the Manage Styles window .....	110

### **Chapter 4 How to develop a multi-page web application**

<b>Introduction to the Shopping Cart application.....</b>	<b>118</b>
The two pages of the Shopping Cart application.....	118
The files and folders used by the Shopping Cart application .....	120
<b>How to work with multi-page web sites.....</b>	<b>122</b>
How to create a web site that has starting folders and files.....	122
How to change the starting page for a web site .....	124
How to rename or delete folders and files .....	124
How to add a class to a web site.....	126
How to redirect or transfer to another page.....	128
How to use cross-page posting .....	130
How to code absolute and relative URLs .....	132
<b>How to create and use data sources .....</b>	<b>134</b>
How to create an SQL data source .....	134
How to configure an SQL data source.....	136
How to bind a drop-down list to a data source.....	138
How to use C# code to get data from a data source .....	140
<b>How to use session state .....</b>	<b>142</b>
How session state works .....	142
How to work with data in session state.....	144
<b>The business classes of the Shopping Cart application.....</b>	<b>146</b>
The members of the three business classes .....	146
The code for the Product class.....	148
The code for the CartItem class.....	148
The code for the CartItemList class .....	150

<b>The web forms of the Shopping Cart application.....</b>	<b>152</b>
The aspx code for the Order page.....	152
The C# code for the Order page.....	154
The aspx code for the Cart page.....	156
The C# code for the Cart page.....	158

## **Chapter 5 How to test and debug ASP.NET applications**

<b>How to test an ASP.NET web site.....</b>	<b>166</b>
How to test a web site.....	166
How to test a web site in two or more browsers at the same time.....	168
How to use the Exception Assistant.....	170
How to use the Page Inspector.....	172
<b>How to use the debugger.....</b>	<b>174</b>
How to use breakpoints.....	174
How to use tracepoints.....	176
How to work in break mode.....	178
How to use the debugging windows to monitor variables.....	180
<b>How to use the trace feature.....</b>	<b>182</b>
How to enable the trace feature.....	182
How to interpret trace output.....	182
How to create custom trace messages.....	184

## **Section 2 ASP.NET essentials**

---

### **Chapter 6 How to use the standard server controls**

<b>An introduction to the standard server controls.....</b>	<b>192</b>
The server controls you'll use the most.....	192
How to use C# to work with the data in server controls.....	194
How to set the focus, default button, tab order, and access keys for a form.....	196
<b>How to use the common server controls.....</b>	<b>198</b>
How to use labels and text boxes.....	198
How to use check boxes and radio buttons.....	200
How to use image and hyperlink controls.....	202
How to use the file upload control.....	204
<b>How to use the button controls.....</b>	<b>206</b>
How to use buttons, link buttons, and image buttons.....	206
How to use the Command event.....	208
<b>How to use the list controls.....</b>	<b>210</b>
How to create drop-down lists and list boxes.....	210
How to use the properties for working with list controls.....	212
How to use the members for list item collections.....	214
How to use check box lists and radio button lists.....	216
How to use bulleted lists.....	216
<b>A CheckOut page that uses server controls.....</b>	<b>218</b>
The user interface and link elements.....	218
The aspx code.....	220
The code-behind file for the CheckOut page.....	222
<b>An introduction to the other standard server controls.....</b>	<b>224</b>
When and how to use the other standard server controls.....	224
How to use the Wizard control.....	226

**Chapter 7 How to use the validation controls**

**Introduction to the validation controls.....232**  
How ASP.NET processes the validation controls..... 232  
How to set the attributes of the validators ..... 234  
How to provide for unobtrusive validation..... 236  
**How to use the validators .....238**  
How to use the required field validator ..... 238  
How to use the compare validator ..... 240  
How to use the range validator ..... 242  
How to use the regular expression validator..... 244  
How to create regular expressions ..... 246  
How to use a custom validator..... 248  
**Validation techniques.....250**  
How to use the validation summary control..... 250  
How to use validation groups ..... 252  
**A CheckOut page that uses validation controls.....254**  
The user interface ..... 254  
The aspx code ..... 256  
The C# code..... 258

**Chapter 8 How to work with state, cookies, and URL encoding**

**How to use view state.....264**  
How to work with view state ..... 264  
How to use view state for your own data..... 266  
**How to use session state .....268**  
How to work with session state..... 268  
When to save and retrieve session state items ..... 270  
Options for storing session state data and tracking session IDs..... 272  
**How to use application state and caching .....274**  
How application state and caching work ..... 274  
How to work with application state and cache data ..... 276  
How to work with application events..... 278  
**How to use cookies and URL encoding .....280**  
How to create cookies..... 280  
How to work with cookies ..... 282  
How to enable or disable cookies ..... 284  
How to use URL encoding ..... 286  
**An application that uses cookies, application state,  
and caching .....288**  
The Order and CheckOut pages..... 288  
The critical C# code for the Order and CheckOut pages ..... 290

**Chapter 9 How to use master pages**

**How to create master pages .....296**  
An introduction to master pages..... 296  
How to create a master page ..... 298  
How to work with the ClientIDMode property ..... 300  
**How to create and develop content pages.....302**  
How to create a content page ..... 302  
How to add content to a page..... 304

	<b>How to customize content pages</b> .....	<b>306</b>
	How to add default content to a master page.....	306
	How to override and accept the default content from a content page.....	306
	How to expose a public property in a master page.....	308
	How to access a public property from a content page.....	308
	<b>The Shopping Cart application</b> .....	<b>310</b>
	Two pages of the Shopping Cart application.....	310
	The aspx code for the master page.....	312
	The code-behind file for the master page.....	314
	The aspx code for the Order page.....	316
	The aspx code for the Cart page.....	318
	The Load event handler in the code-behind file for the Cart page.....	318
<b>Chapter 10</b>	<b>How to use themes</b>	
	<b>An introduction to themes</b> .....	<b>324</b>
	A page with two different themes applied.....	324
	How themes work .....	326
	The difference between customization and style sheet themes.....	328
	<b>How to work with themes and skins</b> .....	<b>330</b>
	How to create and use themes and skins .....	330
	The skln and CSS files for the Bats theme .....	332
	How to apply themes and skins .....	334
	How to remove themes.....	336
<b>Chapter 11</b>	<b>How to use site navigation and ASP.NET routing</b>	
	<b>How to use the navigation controls</b> .....	<b>342</b>
	An introduction to the navigation controls.....	342
	How to create a web.sitemap file .....	344
	How to create a SiteMapDataSource control.....	346
	How to use the Menu control.....	348
	How to use the TreeView control.....	350
	How to use the SiteMapPath control.....	350
	The aspx code for the master page of the Shopping Cart application.....	352
	<b>How to use ASP.NET routing</b> .....	<b>354</b>
	An introduction to ASP.NET routing and friendly URLs.....	354
	How to create a route collection .....	356
	How to work with route parameters .....	358
	How to work with file paths.....	358
	The C# code for the Order page with a dynamic route.....	360
	<b>How to use the navigation controls with ASP.NET routing</b> .....	<b>362</b>
	The global.asax file for the Shopping Cart application with friendly URLs .....	362
	The web.sitemap file with traditional URLs.....	364
	The web.sitemap file with friendly URLs .....	364
<b>Section 3</b>	<b>ASP.NET database programming</b>	
<b>Chapter 12</b>	<b>An introduction to database programming</b>	
	<b>An introduction to relational databases</b> .....	<b>372</b>
	How a table is organized.....	372
	How the tables in a database are related.....	374
	How the columns in a table are defined.....	376
	The design of the Halloween database .....	378

<b>How to use SQL to work with the data in a relational database .....</b>	<b>380</b>
How to query a single table.....	380
How to join data from two or more tables .....	382
How to add, update, and delete data in a table .....	384
<b>How to work with other database objects .....</b>	<b>386</b>
How to work with views .....	386
How to work with stored procedures .....	388
<b>An introduction to ADO.NET 4.5 .....</b>	<b>390</b>
How the basic ADO.NET components work.....	390
Concurrency and the disconnected data architecture .....	392
How to work with data without using a data adapter .....	394
<b>Chapter 13 How to use SQL data sources</b>	
<b>How to create a SQL data source.....</b>	<b>400</b>
How the SqlDataSource control works.....	400
How to choose a data source type .....	402
How to choose a data connection .....	402
How to create a connection.....	404
How to save the connection string in the web.config file .....	406
How to configure the Select statement .....	408
How to create a Where clause.....	410
How select parameters work .....	412
<b>How to use custom statements and stored procedures .....</b>	<b>414</b>
How to enter custom statements .....	414
How to select stored procedures .....	414
How to create a Select statement with the Query Builder.....	416
How to define the parameters .....	418
<b>How to use the DataList control.....</b>	<b>420</b>
How the DataList control works .....	420
How to define the templates for a data list.....	422
How to format a data list.....	424
<b>How to use data binding .....</b>	<b>426</b>
How to bind a list control to a data source .....	426
How to bind the controls in a template .....	428
<b>A Product List application .....</b>	<b>430</b>
The user interface .....	430
The.aspx file .....	432
<b>How to use the advanced features of a SQL data source .....</b>	<b>434</b>
How to create a data source that can update the database .....	434
How to change the data source mode .....	436
How to use caching.....	436
<b>Chapter 14 How to use the GridView control</b>	
<b>How to customize the GridView control .....</b>	<b>442</b>
How the GridView control works .....	442
How to define the fields in a GridView control .....	444
Elements used to create and format fields .....	446
How to enable sorting .....	448
How to enable paging.....	450
How to customize paging .....	452

<b>A list application that uses a GridView control .....</b>	<b>454</b>
The Product List application.....	454
The.aspx file.....	456
<b>How to update GridView data .....</b>	<b>458</b>
How to work with command fields.....	458
How to use events raised by the GridView control .....	460
How to insert a row in a GridView control .....	462
<b>A maintenance application that uses a GridView control .....</b>	<b>464</b>
The Category Maintenance application.....	464
The.aspx file.....	466
The code-behind file .....	470
<b>How to work with template fields .....</b>	<b>472</b>
How to create template fields.....	472
The template version of the Category Maintenance application.....	474
The.aspx code for the template version .....	474
<b>Chapter 15 How to use the DetailsView and FormView controls</b>	
<b>How to use the DetailsView control .....</b>	<b>482</b>
An introduction to the DetailsView control.....	482
Attributes and child elements for the DetailsView control .....	484
How to define the fields in a DetailsView control .....	484
How to enable paging.....	486
How to create a Master/Detail page .....	488
<b>How to update the data in a DetailsView control.....</b>	<b>490</b>
An introduction to command buttons.....	490
How to add command buttons .....	492
How to use events raised by the DetailsView control .....	494
How to create template fields.....	496
<b>The Product Maintenance application.....</b>	<b>498</b>
The operation of the application.....	498
The.aspx file.....	498
The code-behind file .....	504
<b>How to use the FormView control .....</b>	<b>506</b>
An introduction to the FormView control .....	506
How to work with the Item template .....	508
How to work with the EditItem and InsertItem templates .....	510
<b>A Shopping Cart application that uses a FormView control .....</b>	<b>512</b>
The operation of the application.....	512
The.aspx file for the Order page .....	514
The code-behind file for the Order page.....	514
<b>Chapter 16 How to use the ListView and DataPager controls</b>	
<b>How to use the ListView control.....</b>	<b>522</b>
An introduction to the ListView control.....	522
How to configure a ListView control.....	524
How to work with the Layout template.....	526
How to work with the Item template .....	528
How to provide for sorting.....	530
How to provide for paging .....	532
How to customize paging .....	534
How to group ListView data .....	536

<b>A list application that uses a ListView control .....</b>	<b>538</b>
The Product List application.....	538
The aspx file.....	540
<b>How to update ListView data .....</b>	<b>544</b>
How to use buttons to perform update operations.....	544
How to work with the EditItem and InsertItem templates .....	546
How to use events raised by the ListView control.....	546

## **Chapter 17 How to use object data sources with ADO.NET**

<b>An introduction to object data sources.....</b>	<b>552</b>
How 3-layer applications work in ASP.NET .....	552
How to create and work with ADO.NET classes .....	554
How to use the ObjectDataSource control .....	556
How to configure an ObjectDataSource control.....	558
How to work with bound controls.....	558
<b>A Product List application .....</b>	<b>560</b>
The aspx file .....	562
The ProductDB class .....	564
<b>How to create a data access class.....</b>	<b>566</b>
How to design a data access class.....	566
How to create a select method .....	568
How to create update, delete, and insert methods .....	570
How to use attributes to mark a data access class .....	572
<b>A Category Maintenance application.....</b>	<b>574</b>
The design.....	574
The aspx file.....	574
The code-behind file .....	578
The Category class.....	580
The CategoryDB class .....	582
<b>How to use paging and sorting with object data sources .....</b>	<b>586</b>
How to configure an ObjectDataSource control for paging and sorting.....	586
The aspx file that provides for paging and sorting .....	588
The code-behind file that provides for sorting .....	588
How to create a data access class that provides for paging and sorting.....	590

## **Section 4 Finishing an ASP.NET application**

---

### **Chapter 18 How to secure a web site**

<b>An introduction to SSL.....</b>	<b>598</b>
How secure connections work .....	598
How to enable SSL for a project that uses IIS Express .....	600
How digital secure certificates work .....	602
<b>How to use a secure connection.....</b>	<b>604</b>
How to request a secure connection .....	604
How to force a page to use a secure connection.....	606
<b>A Halloween Store application that uses SSL .....</b>	<b>608</b>
The operation of the Halloween Store application .....	608
The code for the Halloween Store application .....	608

<b>Chapter 19</b>	<b>How to authenticate and authorize users</b>	
	<b>An introduction to authentication</b>	<b>614</b>
	Three types of authentication	614
	How forms-based authentication works	616
	<b>How to set up authentication and authorization</b>	<b>618</b>
	How to use SQL Server Express LocalDB with the Web Site Administration Tool	618
	How to start the Web Site Administration Tool	620
	How to enable forms-based authentication	620
	How to create and manage roles	622
	How to create and manage users	624
	How to create and manage access rules	626
	<b>How to use the login controls</b>	<b>628</b>
	How to use the Login control	628
	How to use the LoginStatus and LoginName controls	630
	How to use the CreateUserWizard control	632
	How to use the PasswordRecovery control	634
	How to use the ChangePassword control	636
	How to use the LoginView control	638
	<b>The Authentication application</b>	<b>640</b>
	The pages	640
	The directory structure	644
	The access rules	644
	The web.config files	646
<b>Chapter 20</b>	<b>How to use email, custom error pages, and back-button control</b>	
	<b>How to send email</b>	<b>652</b>
	An introduction to email	652
	How to use a third-party SMTP server	654
	How to create an email message	656
	How to send an email message	658
	How to add an attachment to an email message	660
	How to create an HTML message	662
	How to create an HTML message with an embedded image	664
	<b>How to use custom error handling</b>	<b>666</b>
	An introduction to custom error handling	666
	How to get and use the Exception object for an error	668
	How to create a custom class for handling exceptions	670
	How to handle HTTP errors with the web.config file	672
	<b>How to handle the back-button problem</b>	<b>674</b>
	An introduction to the back-button problem	674
	How to use the Post-Redirect-Get pattern	676
	How to use timestamps	678
<b>Chapter 21</b>	<b>How to configure and deploy ASP.NET applications</b>	
	<b>How to use the Web Site Administration Tool</b>	<b>680</b>
	How to use the Security tab	680
	How to use the Application tab	680
	How to use the Provider tab	680
	<b>An introduction to deployment</b>	<b>682</b>
	Three ways to deploy an ASP.NET application	682
	How to use XCopy deployment	684

<b>How to use one-click deployment.....</b>	<b>686</b>
How to create a publish profile .....	686
How to define the connection .....	686
How to set the file and database options.....	688
How to preview the files to be deployed.....	688
How to publish the web site .....	688
<b>How to create and use a Setup program .....</b>	<b>690</b>
How to create a setup project using InstallShield.....	690
How to configure an InstallShield project for deployment to IIS .....	692
How to add output files to an InstallShield project .....	694
How to create and use the installation files for a Setup program.....	696

## **Section 5 Going to the next level**

---

### **Chapter 22 How to use ASP.NET Ajax**

<b>An introduction to Ajax .....</b>	<b>702</b>
Examples of Ajax applications .....	702
How Ajax works.....	704
<b>An introduction to ASP.NET Ajax.....</b>	<b>706</b>
How ASP.NET Ajax works.....	706
The ASP.NET Ajax server controls.....	708
The ASP.NET Ajax Control Toolkit.....	710
<b>How to use the ASP.NET Ajax server controls .....</b>	<b>712</b>
How to use the ScriptManager control .....	712
How to use the ScriptManagerProxy control.....	714
How to use the UpdatePanel control.....	716
How to use the Timer control .....	718
How to use the UpdateProgress control.....	720
<b>An application that uses ASP.NET Ajax .....</b>	<b>722</b>
The View Products page .....	722
The ProductView class.....	724
The ProductViewList class .....	724
The aspx file and the first UpdatePanel control.....	726
The second UpdatePanel control .....	728
The code-behind file .....	730

### **Chapter 23 How to create and use WCF and Web API services**

<b>An introduction to web services .....</b>	<b>734</b>
SOAP services.....	734
REST services.....	734
<b>How to create a WCF service.....</b>	<b>736</b>
How to start a WCF service application.....	736
How to code a service contract interface and a data contract class .....	738
How to code a service contract class that implements the interface .....	740
How to view and test a WCF service.....	742
<b>How to create a web site that consumes a WCF service.....</b>	<b>744</b>
The Edit Categories page of the WCF client web site .....	744
How to add a WCF service reference to a client web site .....	746
How to consume a WCF service.....	748

<b>How to create a Web API service .....</b>	<b>750</b>
How to start a Web API service.....	750
How to write a web service controller.....	752
How to view and test a Web API service.....	754
<b>How to create a web site that consumes a Web API service .....</b>	<b>756</b>
The Edit Categories page of the Web API client web site.....	756
