11_INTROSPECTION WITH COMMAND LINE TOOLS

<https://docs.ros.org/en/foxy/Concepts/About-Command-Line-Tools.html>

Table of Contents ROS 2 includes a suite of command-line tools for introspecting a ROS 2 system.

- [Usage](#)
- [Example](#)

Examples of sub-commands that are available include:

- daemon: Introspect/configure the ROS 2 daemon
- launch: Run a launch file
- lifecycle: Introspect/manage nodes with managed lifecycles
- msg: Introspect `msg` types
- node: Introspect ROS nodes
- param: Introspect/configure parameters on a node
- pkg: Introspect ROS packages

- run: Run ROS nodes
- security: Configure security settings
- service: Introspect/call ROS services
- srv: Introspect `srv` types
- topic: Introspect/publish ROS topics

- [Behind the scenes](#)
- [Implementation](#)

ROS2 for Beginners from BotBuilder - 14 short videos.

[ROS2 Tutorial for Beginners \(Foxy\)](#)

14 videos 7,729 views Last updated on Jun 16, 2020

A series of short videos averaging about 10 to 12 minutes about ROS2 including Python and C++ examples.

[ROS2 Basics #1 - Installing and Configuring Your ROS2 Environment](#)

[ROS2 Basics #2 - Introducing Turtlesim, Command Line](#)

[ROS2 Basics #3 - Understanding ROS2 Packages and ...](#)

[ROS2 Basics #4 - Understanding ROS2 Executables and Nodes](#)

[ROS2 Basics #6 - Understanding ROS2 Services](#)

[ROS2 Basics #7 - Understanding ROS2 Actions](#)

[ROS2 Basics #8 - Understanding ROS2 Parameters](#)

[ROS2 Basics #9 - Understanding ROS2 Launch File](#)

[ROS2 Basics #10 - Writing a Simple Publisher and Subscriber](#)

[ROS2 Basics #11 - Writing a Simple Publisher and Subscriber](#)

[ROS2 Basics #12 - Writing a Simple Service and Client \(C++\)](#)

[ROS2 Basics #13 - Writing a Simple Service and Client ...](#)

[ROS2 Basics #14 - ROS2 tools - RQt and Ros2bag](#)

APPENDIX ROS2 CHEAT SHEETS

ROS 2 Cheats Sheet

Command Line Interface

All ROS 2 CLI tools start with the prefix 'ros2' followed by a command, a verb and (possibly) positional/optional arguments.

For any tool, the documentation is accessible with,

```
$ ros2 command --help
```

and similarly for verb documentation,

```
$ ros2 command verb -h
```

Similarly, auto-completion is available for all commands/verbs and most positional/optional arguments. E.g.,

```
$ ros2 command [tab][tab]
```

Some of the examples below rely on:

[ROS 2 demos package](#).

action Allows to manually send a goal and displays debugging information about actions.

Verbs:

```
info      Output information about an action.
list      Output a list of action names.
send_goal Send an action goal.
show     Output the action definition.
```

Examples:

```
$ ros2 action info /fibonacci
$ ros2 action list
$ ros2 action send_goal /fibonacci \
  action_tutorials/action/Fibonacci "order: 5"
$ ros2 action show action_tutorials/action/Fibonacci
```

bag Allows to record/play topics to/from a rosbag.

Verbs:

```
info      Output information of a bag.
play     Play a bag.
record   Record a bag.
```

Examples:

```
$ ros2 info <bag-name>
$ ros2 play <bag-name>
$ ros2 record -a
```

component Various component related verbs.

Verbs:

```
list      Output a list of running containers and components.
load     Load a component into a container node.
standalone Run a component into its own standalone container node.
types    Output a list of components registered in the ament index.
unload   Unload a component from a container node.
```

Examples:

```
$ ros2 component list
$ ros2 component load /ComponentManager \
  composition composition::Talker
$ ros2 component types
$ ros2 component unload /ComponentManager 1
```

daemon Various daemon related verbs.

Verbs:

```
start     Start the daemon if it isn't running.
status    Output the status of the daemon.
stop     Stop the daemon if it is running
```

doctor A tool to check ROS setup and other potential issues such as network, package versions, rmw middleware etc.

Alias: **wtf** (where's the fire).

Arguments:

```
--report/-r      Output report of all checks.
--report-fail/-rf Output report of failed checks only.
--include-warning/-iw Include warnings as failed checks.
```

Examples:

```
$ ros2 doctor
$ ros2 doctor --report
$ ros2 doctor --report-fail
$ ros2 doctor --include-warning
$ ros2 doctor --include-warning --report-fail
```

or similarly,

```
$ ros2 wtf
```

extension_points List extension points.

extensions List extensions.

interface Various ROS interfaces (actions/topics/services)-related verbs. Interface type can be filtered with either of the following option, '--only-actions', '--only-msgs', '--only-srvs'.

Verbs:

```
list      List all interface types available.
package   Output a list of available interface types within one package.
packages Output a list of packages that provide interfaces.
proto     Print the prototype (body) of an interfaces.
show     Output the interface definition.
```

Examples:

```
$ ros2 interface list
$ ros2 interface package std_msgs
$ ros2 interface packages --only-msgs
$ ros2 interface proto example_interfaces/srv/AddTwoInts
$ ros2 interface show geometry_msgs/msg/Pose
```

launch Allows to run a launch file in an arbitrary package without to 'cd' there first.

Usage:

```
$ ros2 launch <package> <launch-file>
```

Example:

```
$ ros2 launch demo_nodes_cpp add_two_ints.launch.py
```

lifecycle Various lifecycle related verbs.

Verbs:

```
get       Get lifecycle state for one or more nodes.
list     Output a list of available transitions.
nodes    Output a list of nodes with lifecycle.
set     Trigger lifecycle state transition.
```

msg (deprecated) Displays debugging information about messages.

Verbs:

```
list      Output a list of message types.
package   Output a list of message types within a given package.
packages Output a list of packages which contain messages.
show     Output the message definition.
```

Examples:

<pre>\$ ros2 msg packages \$ ros2 msg show geometry_msgs/msg/Pose</pre>		<pre>\$ ros2 pkg prefix std_msgs \$ ros2 pkg xml -t version</pre>		<pre>Verbs: list Output a list of available service types. package Output a list of available service types within one package. packages Output a list of packages which contain services. show Output the service definition.</pre>	
multicast Various multicast related verbs. Verbs: receive Receive a single UDP multicast packet. send Send a single UDP multicast packet.		run Allows to run an executable in an arbitrary package without having to 'cd' there first. Usage: \$ ros2 run <package> <executable> Example: \$ ros2 run demo_node.cpp talker		test Run a ROS2 launch test.	
node Displays debugging information about nodes. Verbs: info Output information about a node. list Output a list of available nodes. Examples: \$ ros2 node info /talker \$ ros2 node list		security Various security related verbs. Verbs: create.key Create key. create.permission Create keystore. generate.artifacts Create permission. list.keys Distribute key. create.keystore Generate keys and permission files from a list of identities and policy files. distribute.key Generate XML policy file from ROS graph data. generate.policy List keys. Examples (see sros2 package): \$ ros2 security create.key demo.keys /talker \$ ros2 security create.permission demo.keys /talker \ policies/sample.policy.xml \$ ros2 security generate.artifacts \$ ros2 security create.keystore demo.keys		topic A tool for displaying debug information about ROS topics, including publishers, subscribers, publishing rate, and messages. Verbs: bw Display bandwidth used by topic. delay Display delay of topic from timestamp in header. echo Output messages of a given topic to screen. find Find topics of a given type type. hz Display publishing rate of topic. info Output information about a given topic. list Output list of active topics. pub Publish data to a topic. type Output topic's type. Examples: \$ ros2 topic bw /chatter \$ ros2 topic echo /chatter \$ ros2 topic find rcl_interfaces/msg/Log \$ ros2 topic hz /chatter \$ ros2 topic info /chatter \$ ros2 topic list \$ ros2 topic pub /chatter std_msgs/msg/String \ 'data: Hello ROS 2 world' \$ ros2 topic type /rosout	
param Allows to manipulate parameters. Verbs: delete Delete parameter. describe Show descriptive information about declared parameters. dump Dump the parameters of a given node in yaml format, either in terminal or in a file. get Get parameter. list Output a list of available parameters. set Set parameter Examples: \$ ros2 param delete /talker /use_sim_time \$ ros2 param get /talker /use_sim_time \$ ros2 param list \$ ros2 param set /talker /use_sim_time false		service Allows to manually call a service and displays debugging information about services. Verbs: call Call a service. find Output a list of services of a given type. list Output a list of service names. type Output service's type. Examples: \$ ros2 service call /add_two_ints \ example_interfaces/AddTwoInts "a: 1, b: 2" \$ ros2 service find rcl_interfaces/srv/ListParameters \$ ros2 service list \$ ros2 service type /talker/describe_parameters			
pkg Create a ros2 package or output package(s)-related information. Verbs: create Create a new ROS2 package. executables Output a list of package specific executables. list Output a list of available packages. prefix Output the prefix path of a package. xml Output the information contained in the package xml manifest. Examples:
